Solar Power

(Roof-mounted solar power in factory and warehouses)

Thai ORIX Leasing Co.,Ltd.

Power generation in Thailand is mainly rely on low-cost natural gas taken in their own countries (Gulf of Thailand), but in 2024 it has been said to be exhausted. On the other hand, power generation rate of the past decade, Thailand has been rising at a 4.8% annual rate. (In the past two years, over 20% per annum) is to reduce power purchased by placing the solar power plant roofs, also it is possible to reduce the heat from the roof.

The amount of solar radiation in Thailand is ideal for solar power generation, it can be power generation system of maximum 500 KW from the roof of 4,000 m².

ORIX is a solar panel handling high top class in Japan.

This business is run by the support of Thai Orix Leasing Co., Ltd.
