

Engine Forklift

Counter Type

(1.0t ~ / Load Capacity)

Gasoline Type

Fuel has a gasoline as a power source. Gasoline type, large output of per emissions compared to diesel type, it is characterized by vibration and noise is a little quiet.

Diesel Type

Fuel has a light oil as a power source.
There is a stickiness of the engine compared to gasoline vehicles.
(There is no risk of engine stall, etc.)

LPG Type

Fuel use the LP gas. (Generally combined with gasoline).
Fuel cost is only a low cost for LP gas. Furthermore LP gas as compared with the gasoline is not carbon to complete combustion occurs. Oil does not dirt.
