Forklift Rental

Forklift is intended to be used in factory works.
If your purpose is to use, rental will be the best.

Maintenance Benefit

Forklift is to be used for work, so we must avoid from "Breakdown" and "Failure" conditions. That means must keep good conditions by preventive maintenance and forklift rental service is the answer. We are specialist in maintenance, so you can feel relieved our service is efficient and without waste. Because we are professional in maintenance, our service fee is appropriate, efficient and cheaper than other supplier.

Cost levelling

By repairing or replacement of consumable goods, can cause significant cost increase of the month. However forklift rental include these cost, so the monthly cost of forklift can be leveled. And because cost are fixed, it makes easier to manage.

Low Cost

Not just maintenance cost decrease, since the rental company has set a rental price to other customers premise to rent, so the price will be cheaper than using only by their customer only.

Benefits in accounting

Unnecessary to purchase and capitalized or depreciation, just only deduct as expenses.

Operator Training

Rental companies will continue to maintain a good situation of forklift with operators to protect their assets. Therefore to operate forklift safely, rental companies must give correct knowledge to operators of customer.

Avoid Obsolescence

If owning forklift by yourself, often miss the timing to purchase new truck. Therefore might compromise the culture of the factory and look bad if using old forklift. Culture of the factory might be increased by aesthetics and functionality update constantly with new rental.

*We offer a wide range of contract, from one unit short term contract to dozen of fleet contract.
We boasts the largest number of types of forklift in Thailand.
